## Personal Profile

Hi! My name is **Fery Wardiyanto** full-stack web developer with more than 5 years of experience. Focused on PHP & Javascript web technology but won't stop me to improve & gain other experiences. Design and build a product with a diverse set of devices in mind, using tools and automation to speed up development times.

I am always curious and try to learn new things and something may have bright prospects in the future in the technology department. I love open source and sometimes I give a contribution to projects or tools that I used to work with. Start by asking a silly question or give some feedback about things that I use or see what I can do to make it better.

I also like swimming, watching movies and anime, listening to music, reading manga in my free time.

## Formal Education
